September 2018

## DaSy News

### Data Retention and Destruction guidance

It is critical that state Part C and Part B 619 governance policies address record retention and data destruction. The newest section of our [Data Governance Toolkit](#) provides guidance, key considerations, and an editable template for creating your state policy. Check out [Data Retention and Destruction!](#)

### DaSy work featured in OSEP Update

The August 2018 *OSEP Update* focused on *Targeting Outcomes and Improving Results*. OSEP Director Ruth Ryder wrote about our recent Improving Data, Improving Outcomes conference and celebration of the 15th anniversary of Child and Family Outcomes data collection. Our new [Data Culture](#) Toolkit was also featured in the newsletter. You can read the August issue of the OSEP Update [here](#).

### Data Culture isn't built in a day

Creating a [culture of data use](#) requires attention to People, Process, and Product. A short blog post from the Whole Whale company outlines the key points about each of those components and includes guiding questions for [data teams](#): [How to Build a "Data Culture"???](#)

## Events & Presentations

### Let's Talk! Race, Bias, and Equity Webinar (Sept. 25)

This webinar will focus on race and implicit bias in in early childhood programs...

September 25 @ 1:00 pm - 1:50 pm

### 2018 Early Childhood Data Systems Survey Results (Sept. 25)

Join the Early Childhood Data Collaborative for the latest national and state re...

### How Strong Data Governance Improves Data Quality Integration (Sept. 26)

CIID invites you to register to learn how [data governance](#) improves [data quality](#) ...

<https://dasycenter.org/>

My mission:  
Convince you to invest in  
building a comprehensive  
system of personnel data

“In successful companies, metrics have for decades been the basis for decision making. In manufacturing and sales, new data are reported daily. Financial data have been central to business management for centuries.”

### [Metrics Are for Playmakers](#)

by Howard Risher *September 19, 2018*

Why do children and families deserve anything less?

**You have to  
build it to  
be able to  
use it.**

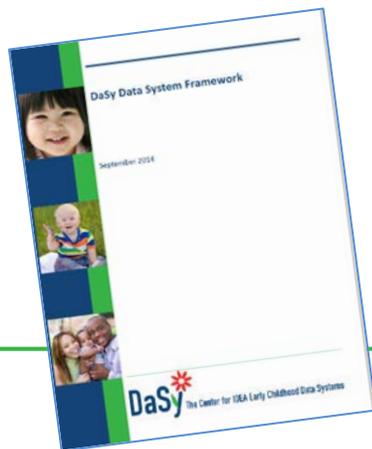

## Getting to Data-informed Decision-making

- \* Identify needed data elements
- \* Collect data
- \* Verify data/check for quality
- \* Store data
- \* Analyze data
- \* Make data readily accessible to users/stakeholders
- \* Build capacity of users/stakeholders to interpret data (“data literacy”)

# How to think about a “data system”

The **hardware, software, and other applications** that enable Part C and Section 619 programs to **collect** data about children, families, workforce, and/or program characteristics (e.g., program quality), as well as the **analysis, reporting, and data use** practices associated with those data.

System for collecting,  
storing, and using data

<http://dasycenter.org/resources/dasy-framework/>

# What can one do with personnel data?

Contribute to general  
understanding of service  
delivery and outcomes

Knowledge  
Development

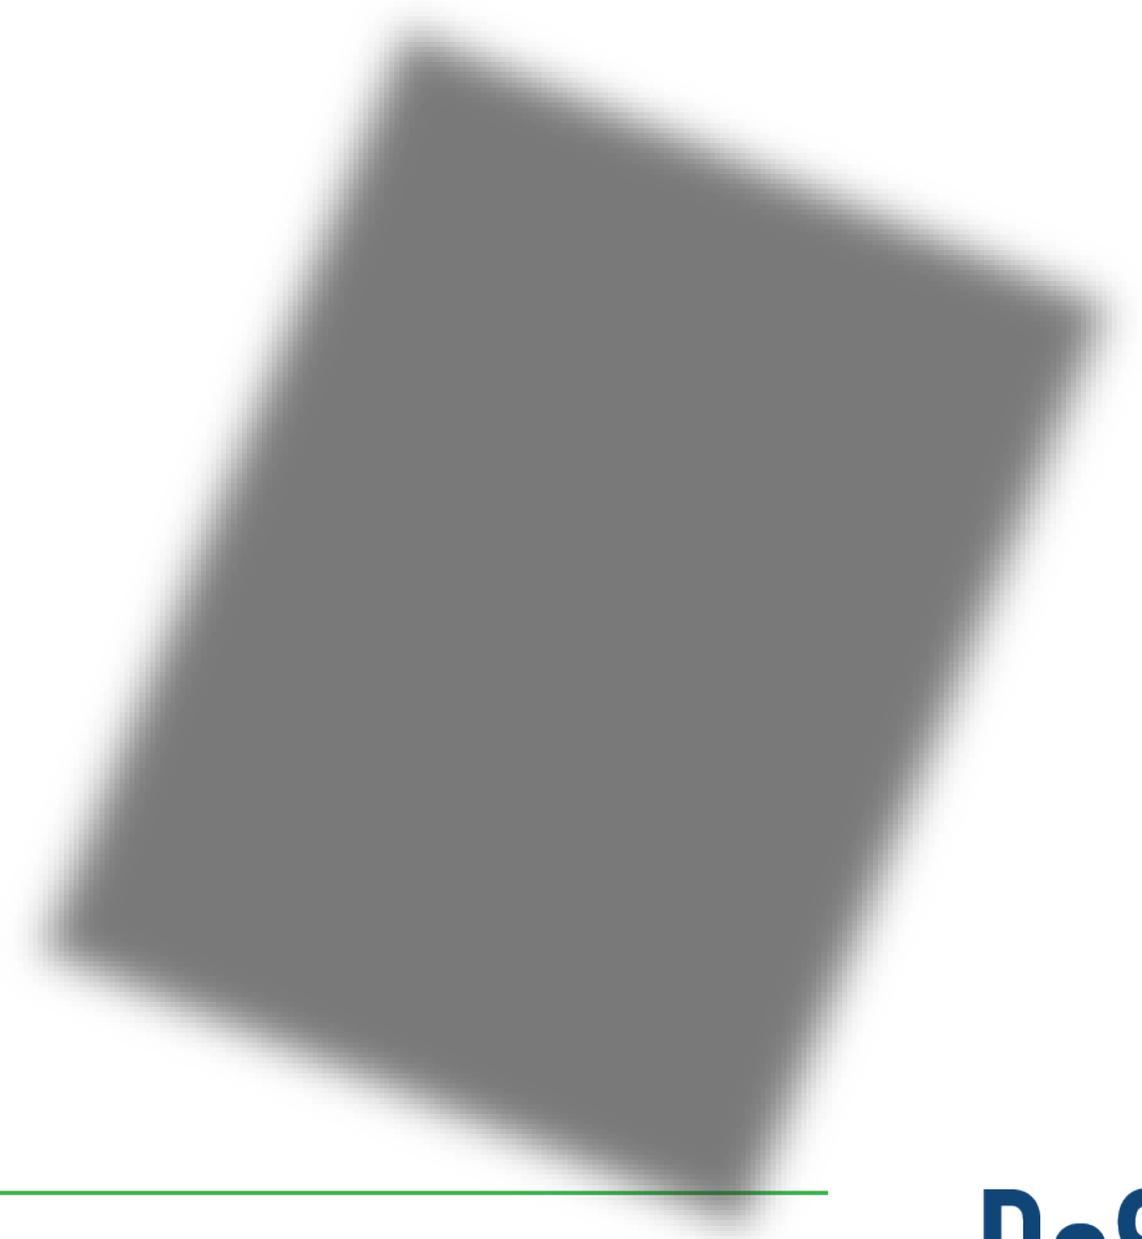

# Questions are the drivers for data planning

- \* What data elements to collect
- \* What analyses to run
- \* What tables to produce

Need to **design and build** the data system based on questions

Need to **enhance** the data system based on questions

Need to **link data** across data systems based on questions

# Who are these people?

11. How many personnel are employed in EI/ECSE?
- number and FTE employed and contracted?
  - by program?
  - by type of personnel (early interventionist, physical therapist, etc.)?

Also Questions 2, 4, 12

# Polling

- \* See instructions on the table to join the poll.
- \* Some questions – 1 answer for EI and 1 for ECSE
- \* Some questions – 1 for the state

# Can your program produce a reasonably good count of how many people are employed in it statewide?

- Yes, for all personnel **A**
- Yes, for some personnel **B**
- No **C**
- Don't know **D**
- Other **E**

# Can your program describe anything about the demographics of the workforce (gender, race/ethnicity, age, etc.)?

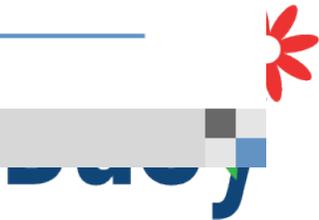

Yes, for all personnel

Yes, for some personnel

No

Don't know

Other

# Can your program produce any descriptive numbers about their qualifications (certifications, degrees, years of experience, etc.)?

Yes, for all personnel

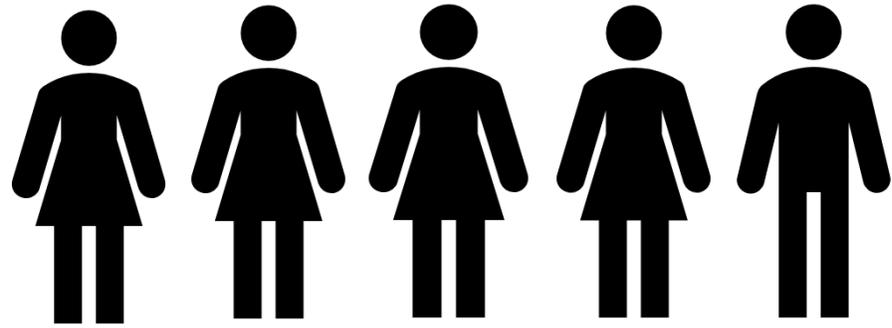

Yes, for some personnel

No

Don't know

Other

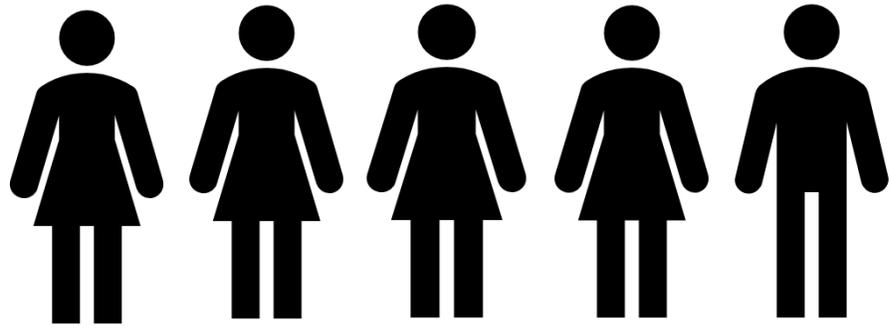

# What to count

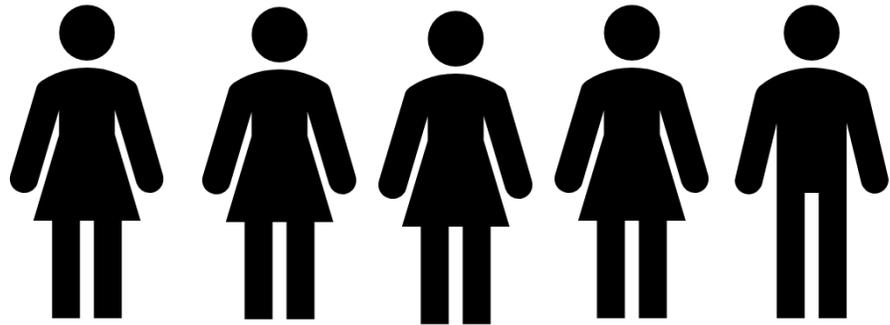

= 5 people

Full Time Equivalent

# What to count

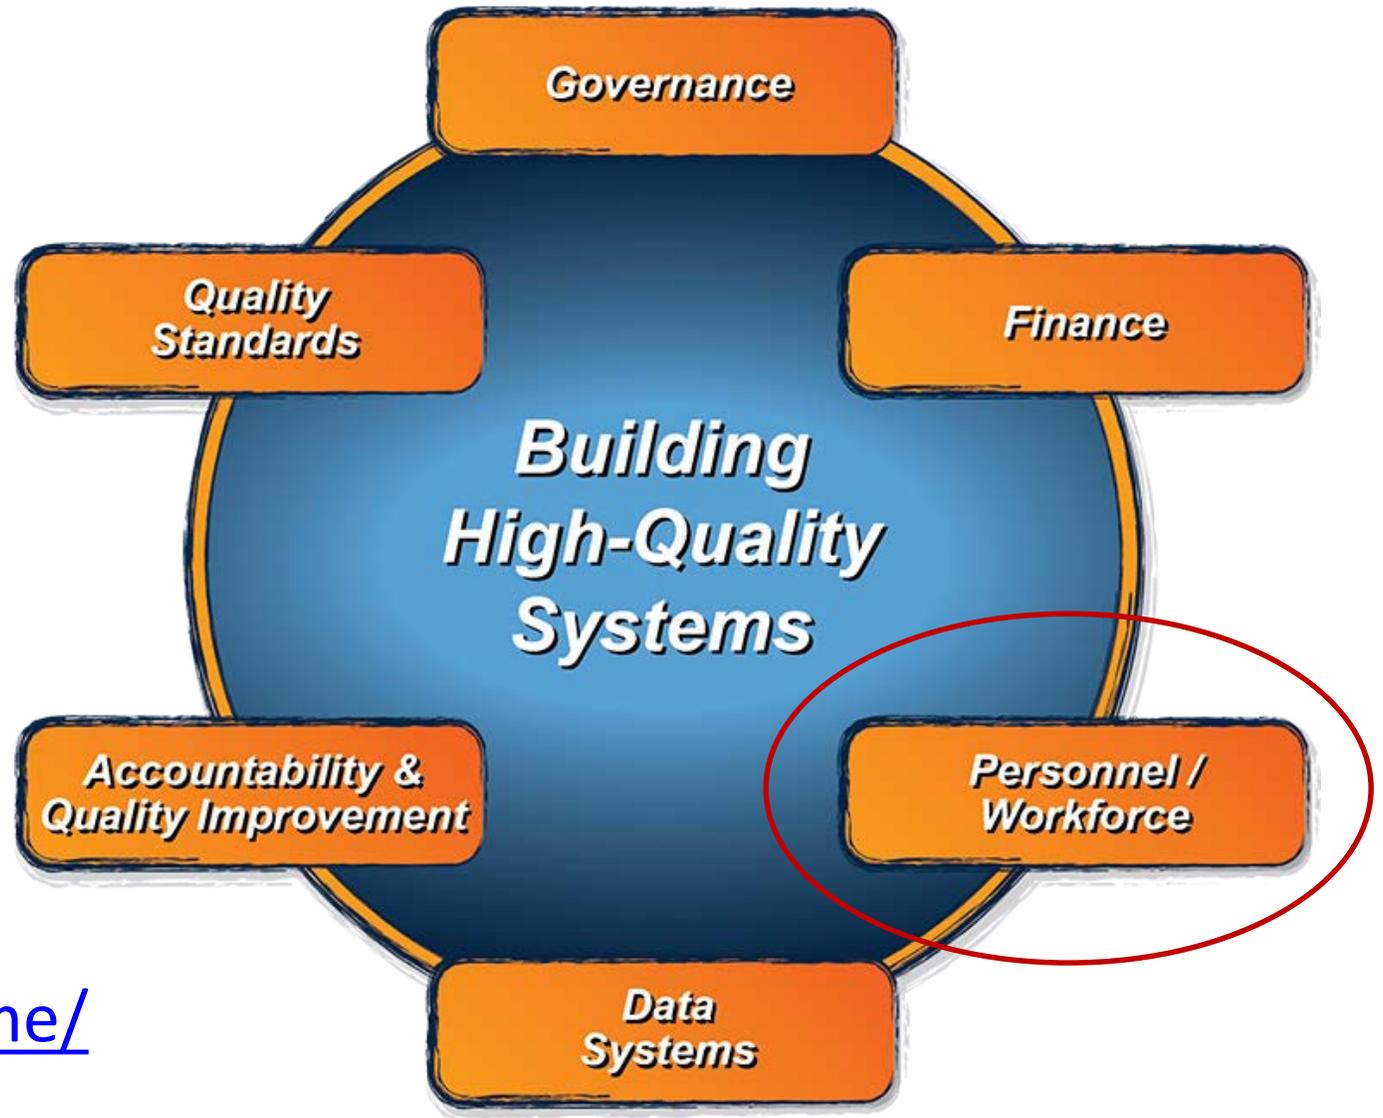

= 5 people

= 2.15 FTE

50% 100% 25% 40% 100%

# ECTA System Framework

<http://ectacenter.org/sysframe/>

# System Framework: Personnel/Workforce Component

## Subcomponents

- \* Leadership, Coordination and Sustainability
- \* State Personnel Standards
- \* Preservice Personnel Development
- \* Inservice Personnel Development
- \* Recruitment and Retention
- \* Evaluation

# Does your program have any pipeline data for new graduates?

Yes, for all  
personnel **A**

Yes, for some  
personnel **B**

No **C**

Don't know **D**

Other **E**

# ECPC Family Feud: Sources for new personnel

[Redacted]

[Redacted]

[Redacted]

[Redacted]

# Preservice and Recruitment and Retention

- \* Preservice: Questions 1 and 6
- \* Recruitment: Questions 7 through 10
- \* Retention: Question 17 through 20

# Data System Planning: Identifying the unit

- \* What is the issue? What or who is this question asking about?
- \* What is the appropriate unit of information? (Hint: imagine an answer)
- \* How might you get this information?
- \* How else might you look at the data to get more information on the issue?

# Planning for Data Collection: How often? Where?

- \* One time vs. intermittent vs. ongoing data collection
- \* Considerations: Should the data be in a state data system?
  - What is the unit of analysis? (person, position, program)
    - Analyzing people by program  $\neq$  program as the unit of information
  - How difficult is it to collect the data?
  - How quickly do the data change?
  - Is the information sensitive?
  - How important is it that your data be timely?

# Inservice Professional Development

\* Questions 13 through 16, 24

# Multiple perspectives on PD data

- \* How much PD was provided? (output in a logic model)
  - 3 sessions attended by a total of 145 practitioners
  - 15 coaches hired who provided 63 coaching sessions
- \* How much PD was received?
  - 200 practitioners were expected and 145 attended
  - 350 practitioners work with children and families in the target program and 145 attended; 7 out of 26 early interventionists have received coaching
  - Think about how to measure “reach”
- \* What are the competencies of the recipients of the PD?
  - Measure knowledge? Measure performance?

# Does your program have a way of tracking participation in professional development activities?

Yes, for all personnel

Yes, for some personnel

No

Don't know

Other

# Workforce Registries

- \* Information system that captures data about early childhood and afterschool practitioners in a variety of roles
- \* Designed to promote professional growth and development
- \* Captures data about early childhood and afterschool practitioners in a variety of roles
- \* Based on state career level systems that provide a framework for professional development.

Source:

# Does your state have a workforce registry?

Yes

No

Don't  
know

# Does your state's registry include any information about EI or ECSE personnel?

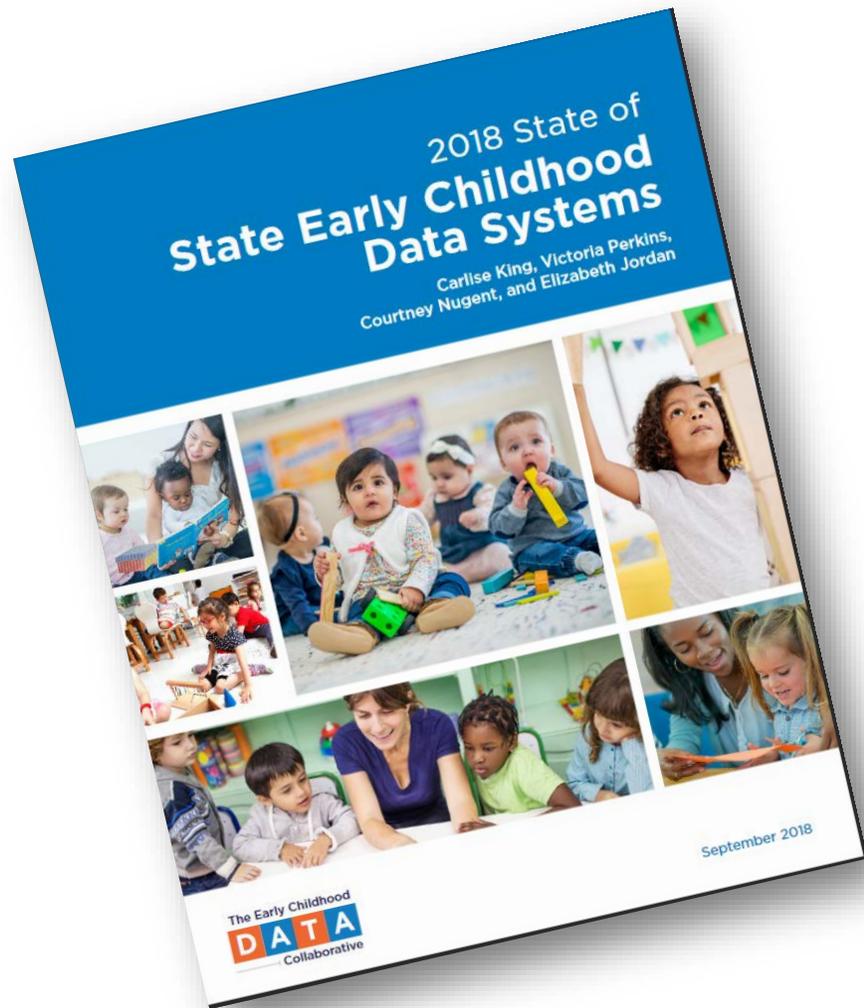

EI only

ECSE only

EI and ECSE

No

Don't know

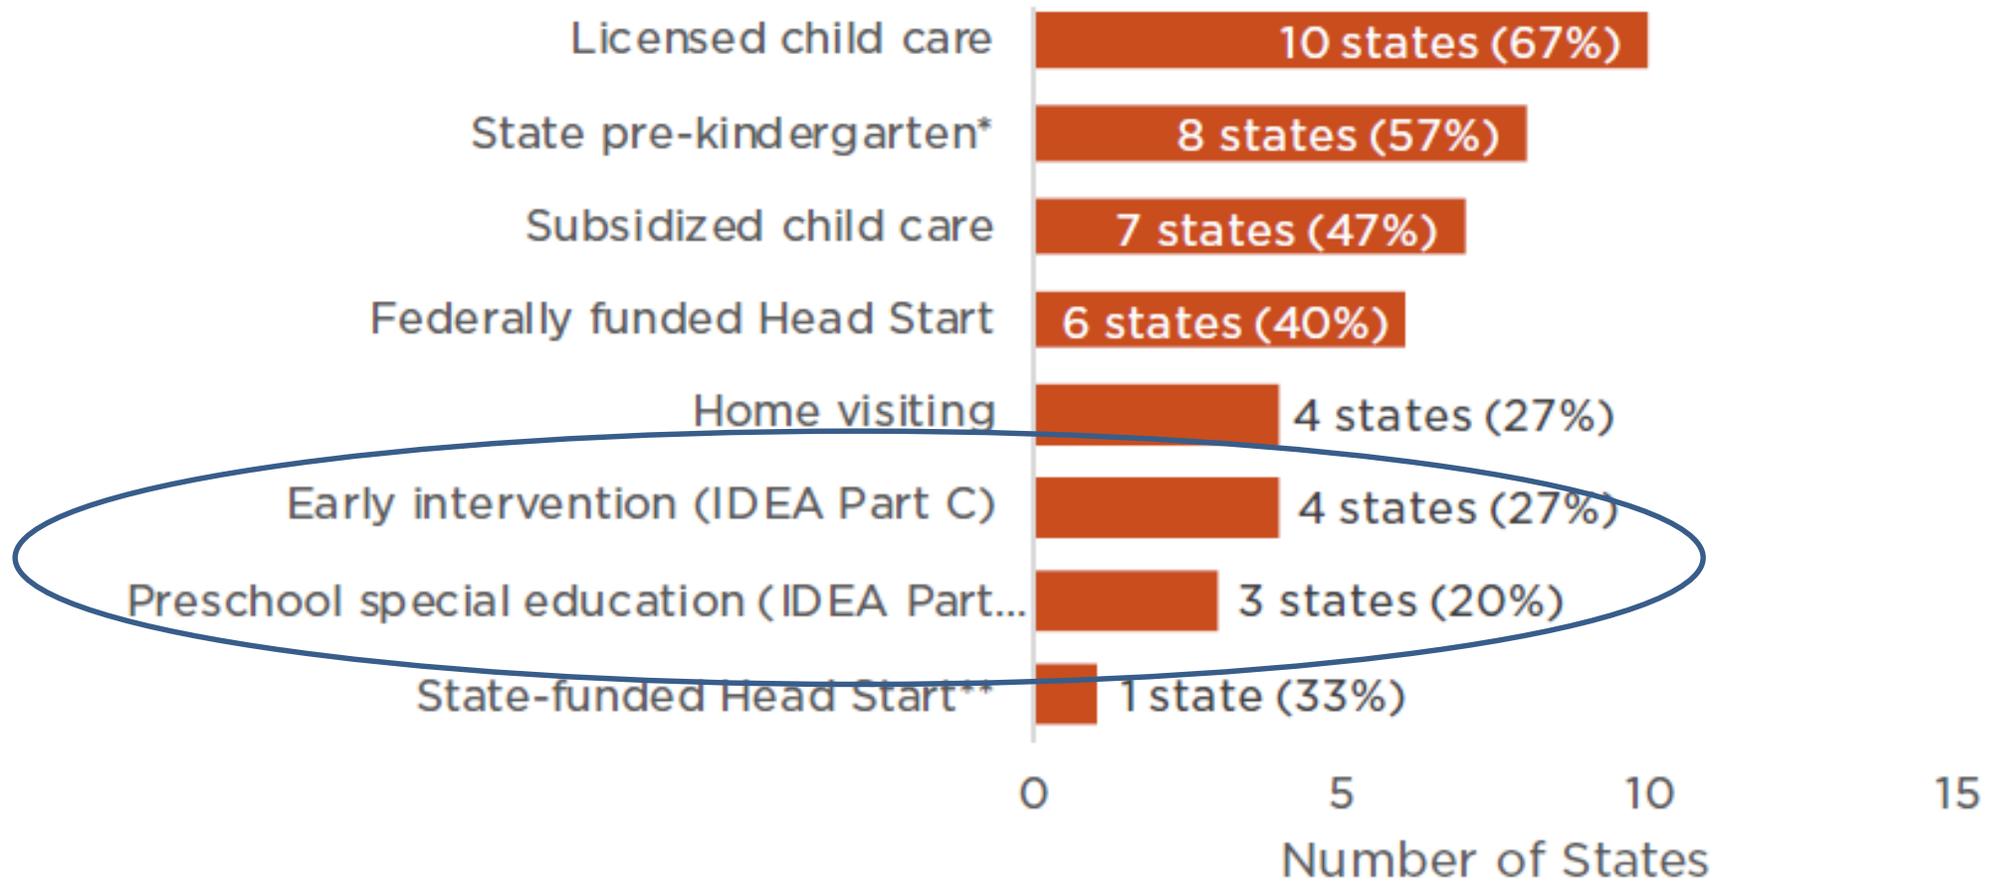

- ✿ From Early Childhood Data Collaborative
- ✿ Looks at child, program and workforce data

<https://www.ecedata.org/wp-content/uploads/2018/09/ECDC-50-state-survey-9.25.pdf>

# From 2018 State of State Early Childhood Data Systems

- \* 42 states (84%) have a workforce registry
  - Registries typically track education, training, and employment information. The scope and data capacity of registries varies.
- \* 15 states (30%) link individual workforce data across ECE programs
- \* 7 states (14%) collect workforce data and have capacity to link but do not currently do so.
- \* 18 states (36%) are planning to link
- \* 10 states (20%) lack capacity to link, do not plan to link.

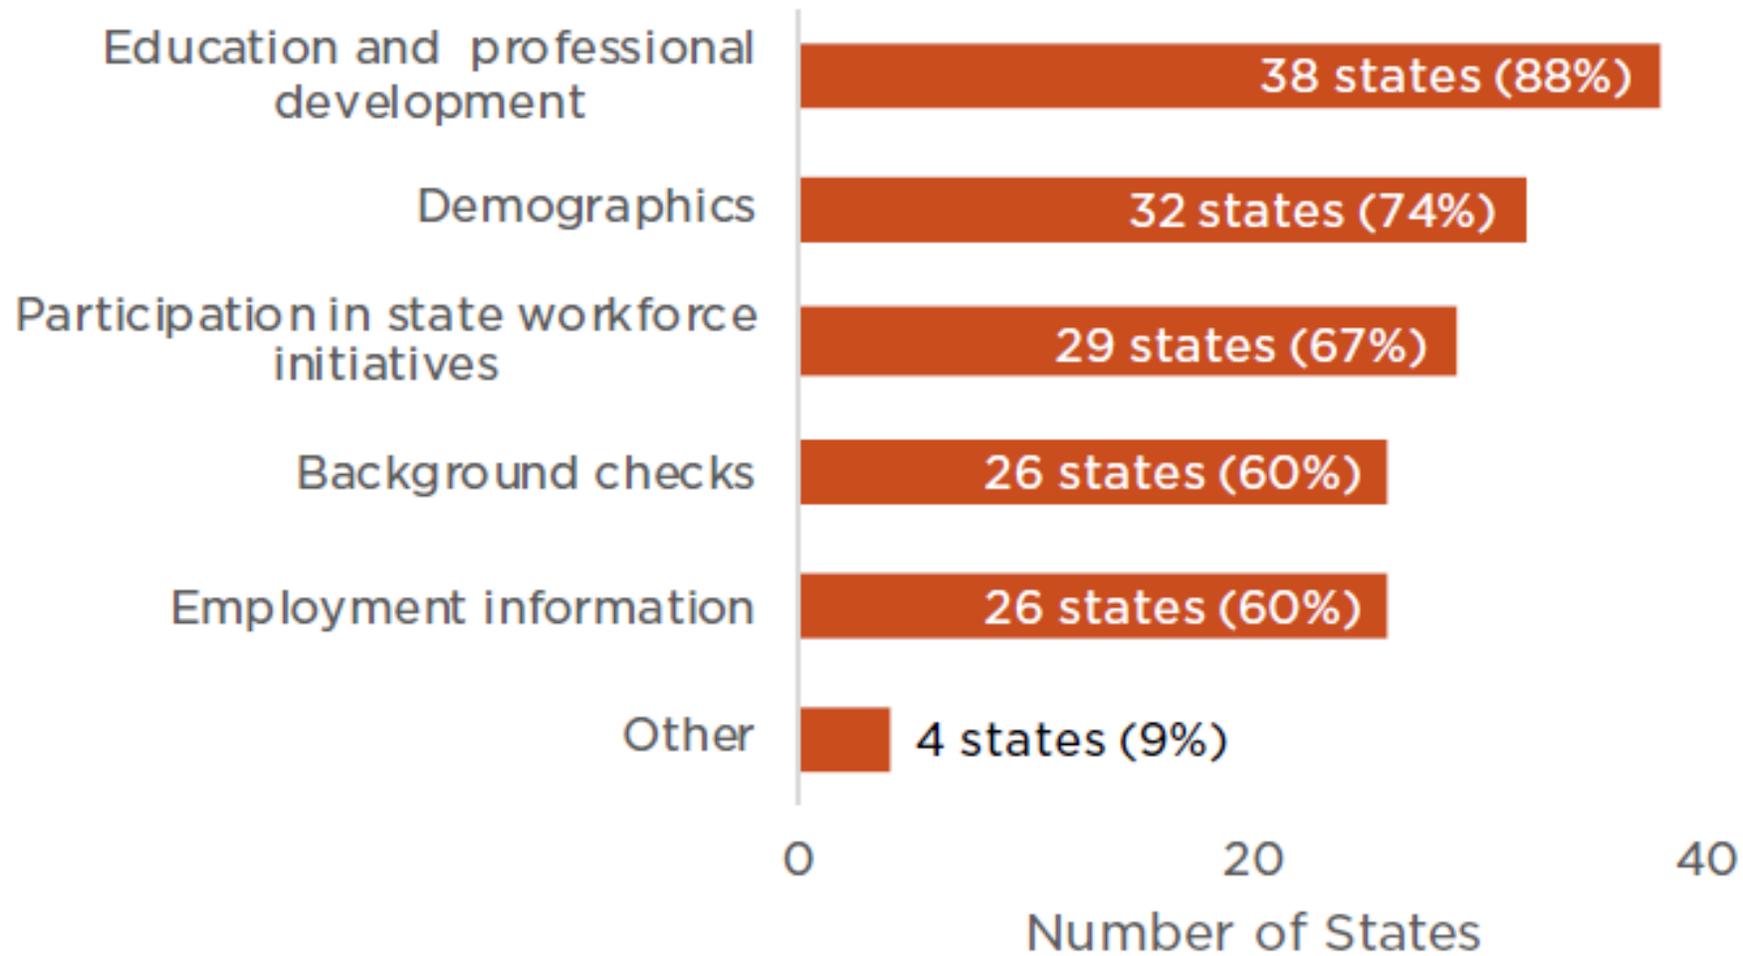

**Figure 18. States Linking Workforce-Level Data by ECE Program (n= 15 states)**

\*Number of states included with state-prekindergarten (n= 14)

\*\* Number of states included with state-funded Head Start (n= 3)

**Figure 19.** Types of Workforce-Level Data Collected (n= 43 states)

# Recommendation on workforce

federally funded Head Start data so policymakers and practitioners have a more comprehensive view of children's learning and development.

- 3. Expand efforts to collect and link data about the early childhood workforce.** To construct better policies and practices to support the early childhood workforce, policymakers need data about current workforce conditions (i.e., professional development, compensation, and turnover).
- 4. Communicate with parents about data privacy policies and uses of early childhood data.** Families need to know that data about their children will be secure. It is important for states to have

Do workforce registries have  
promise as a data source for EI  
and ECSE personnel?

# The need to share and link data

- \* Linking data sets on personnel within the same agency
- \* Linking data sets on personnel across agencies
- \* Linking data sets on personnel to non-personnel data
  
- \* Questions 3 and 5
- \* Questions 21, 22, 23

# Where are the data (demographics, credentials, date hired, % FTE) on individuals in your program's workforce?

At the state, in one data set **A**

At the state, in more than one data set in same agency **B**

At the state, in more than one data set at different agencies **C**

Some at local level, some at state in one data set **D**

Some at local level, some in state in more than one data set **E**

We don't have any data at the state level **F**

Don't know **G**

Other **H**

# The importance of interoperability

- Interoperability refers to the ability of two or more systems or components to exchange information and to use the information to make better decisions.
- Technical term but also incorporates social, political, organizational factors.
- Source:  
<https://www.acf.hhs.gov/about/interoperability>

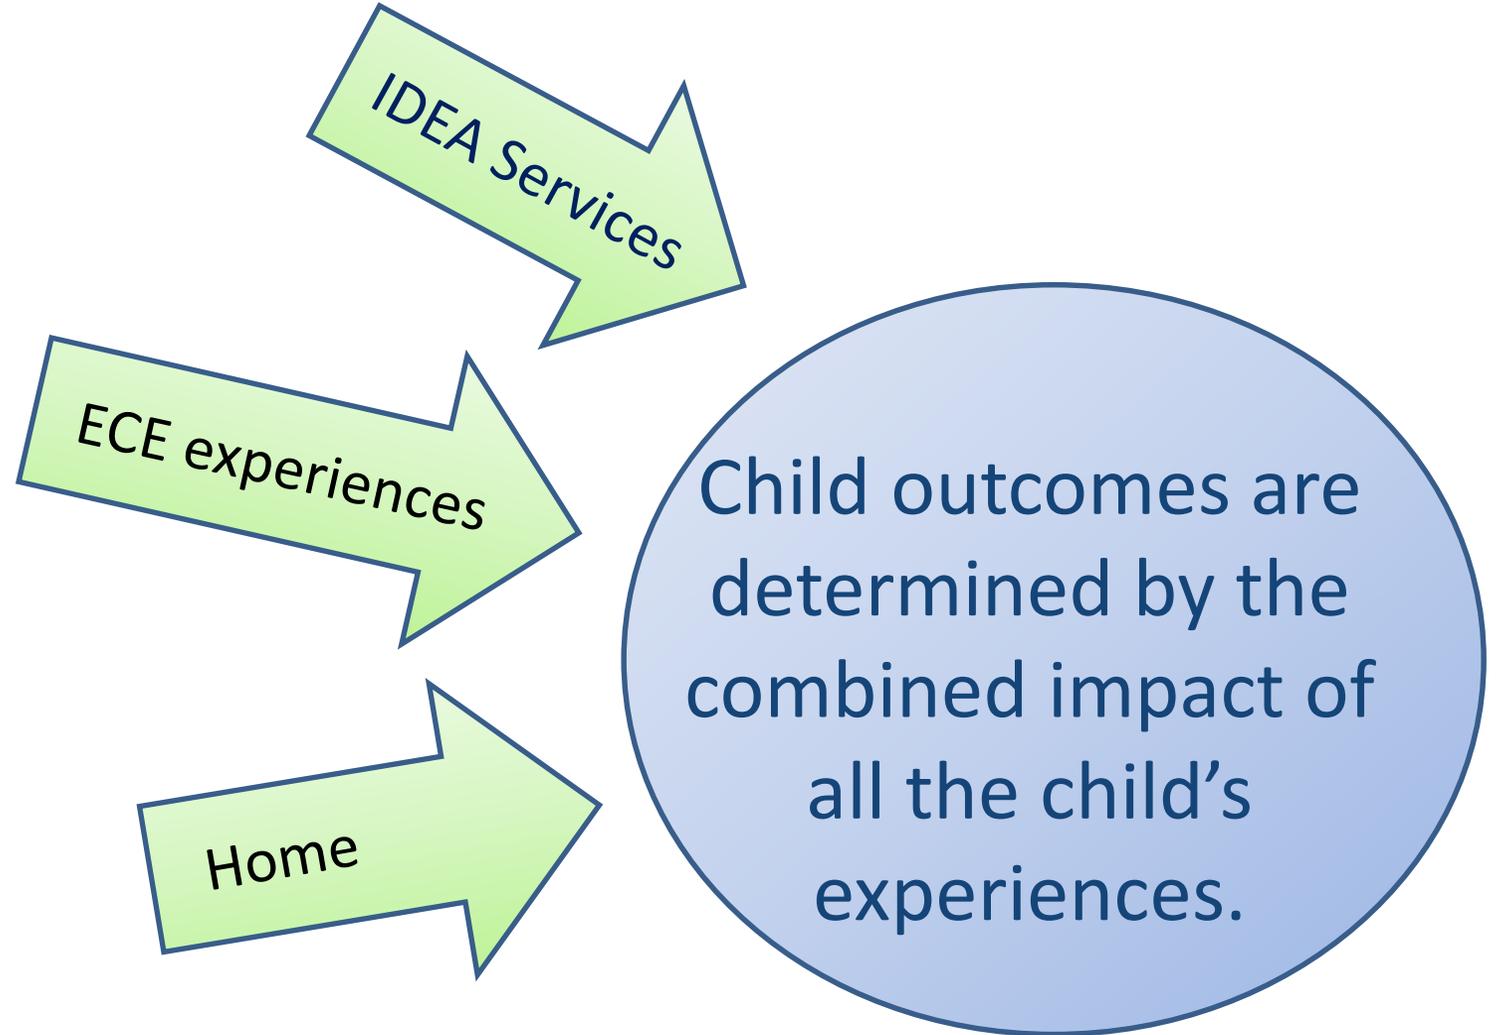

# Sharing data as the default position

Quotes from the [paper](#):

- ✿ Our data are most useful for agencies, the families we serve, direct service providers, and decision-makers at all levels when they are appropriately and readily shared across organizational boundaries.
- ✿ A “Data Sharing First” strategy is being promoted internally that will fundamentally shift our thinking from a default position of reluctance to share data to a forward-leaning posture of “Yes, Unless.”

Why data on general  
early care and  
education  
workforce?  
(Questions 3 and 5)

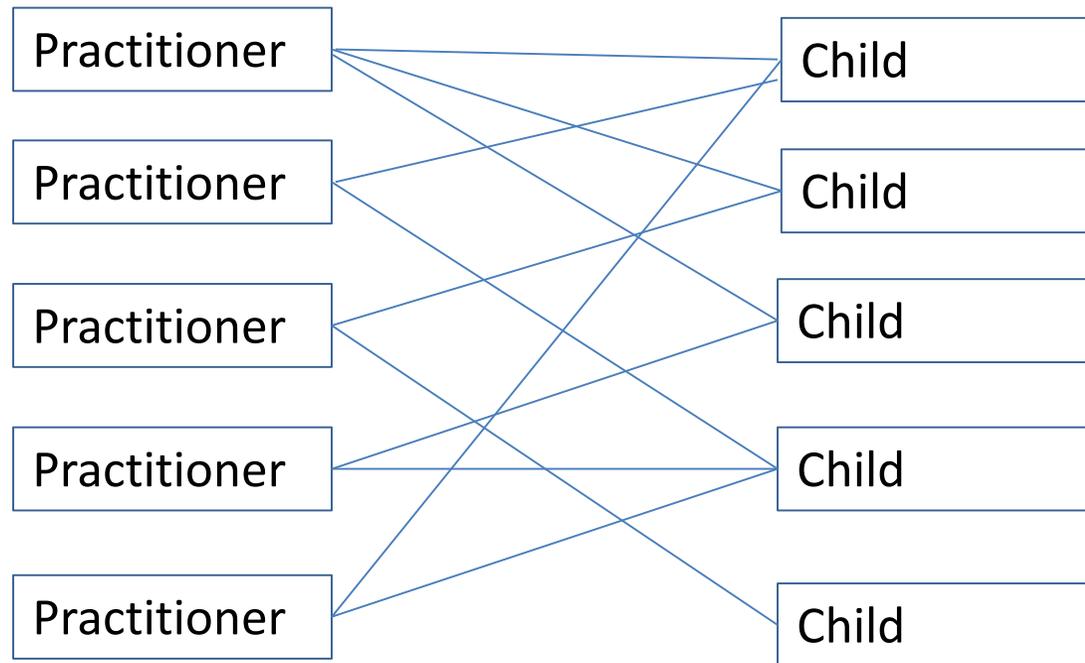

The holy grail of  
personnel data:  
Linking data on  
personnel to  
child data

# Working with many to many relationships

- \* Each practitioner has more than one child/family.
- \* Each child or family can have more than one practitioner.

Challenging  
but doable!

# Take Aways

DaSy The Center for IECA Early Childhood Data Systems

Questions States and Local Programs Might Want to Answer About Early Intervention and Early Childhood Special Education Personnel

Questions	Prevalence	Standards	Intervance	Recruitment/Workforce Characteristics	Retention
1. How many of each type of personnel employed/contracted in EIECSE graduate from within state institutions of higher education each year?	*				
2. What are the levels of education and years of experience of EIECSE practitioners? (2.A.1.b)*	*				
3. What are the levels of education and years of experience of general early care and education practitioners working with children with IFSP/IEPs? (2.A.1.c)*	*				
4. How many EIECSE practitioners have specific types of credentials/licenses (e.g. EIS, preschool, special education, licensed therapist)? (2.A.1.d)*	*				
5. How many general early care and education practitioners working with children with IFSP/IEPs have specific types of credentials/licenses (e.g., early childhood, preschool, Child Development Associate [CDA], special education, licensed therapist)? (2.A.1.e)*	*				
6. How many new credentials/licenses for potential EIECSE personnel are awarded each year in the state?	*				
7. What recruitment strategies are in place in the state? How many practitioners are hired through each strategy or combination of strategies?	*				
8. How many qualified applicants apply for each position?	*				
9. How many and what kinds of positions stay open because a qualified applicant cannot be located?	*				
10. How many and what kind of positions are filled with candidates with lesser qualifications than the program wanted?	*				
11. How many personnel are employed in EIECSE (number and FTE, personnel)?	*				
12. What are the demographic characteristics of EIECSE practitioners (e.g., age, gender, ethnicity/race, language[s] spoken)? (2.A.1.a.)*	*				
13. What professional development activities do EIECSE service providers/teachers participate in during employment? (2.A.3.a.)*	*				
14. How much professional development (e.g., hours, continuing education units [CEUs]) did EIECSE practitioners receive over a	*

# Take Aways

- \* Conduct an inventory of what your state agency knows about personnel
  - How many questions can your state answer now?
- \* Identify what the state agency absolutely must know to move closer to your state vision for EI and ECSE (and the “nice-to-knows”)
  - Is there a need to:
    - Collect new data?
    - Get the data the locals have to the state?
    - Link data that are already collected?
    - Etc.

# Take Aways

- \* Invest the human and fiscal resources to put the state on a path toward data-informed personnel planning

**You have to build  
it to be able to  
use it.**

Now is a good  
time to start  
turning on the  
lights
