## R2P Leadership Brief

2018 VOLUME 1, NUMBER 1

This inaugural *R2P* (Research to Practice) *Brief* and subsequent *Briefs* will include findings from a meta-analysis of leadership practices studies (Dunst et al., 2018) and descriptions of the implications of the results for leadership development (Brittain & Bernatovicz, 2014). The meta-analysis included 112 studies of more than 39,000 followers (the term used in the leadership literature to describe employees, staff, workers, etc.). The studies were conducted in 31 countries in diverse programs, organizations, and businesses.

### Types of Leadership

The types of leadership that were the focus of review were ones that actively involve followers at all levels of a program or organization; what leaders do to promote followers' understanding of and commitment to an organization's mission and goals; and what leaders do to engage, encourage, and support followers' use of behavior and practices that leads to high quality outcomes. This street-level, vertical approach to leadership is considered an alternative to a hierarchical, top-down approach to leadership.

### Leadership Practices

As part of coding the leadership practices, we discovered that many of the same terms were used to describe different leadership practices and different terms were often used to describe the same practices. The studies included 64 different measures of different kinds of leadership practices. The measures were content analyzed and resulted in 11 types of leadership practices that were grouped into four sets of practices. These are listed in the table below with brief descriptions of each type of practice.

The leader-centered practices include things leaders do to inspire followers, create follower commitment, and model desired follower behavior. The shared

responsibility practices include things leaders do to encourage follower active participation in decisions and actions that contribute to desired organization outcomes. The employee capacity-building practices include things leaders do to promote follower acquisition and use of the knowledge and skills that lead to high quality program or organization outcomes. The employee behavior practices include things leaders do to establish performance expectations and the follower rewards for engaging in those behavior and practices. Alimo-Metcalfe and Alban-Metcalfe (2001) noted that these practices include the types of "leadership that has a powerful effect on the motivation, self-confidence, self-efficacy, [and] performance of staff" (p. 8).

### Table: Brief Descriptions of the Eleven Types of Leadership Practices

Leadership Clusters/Practices	Brief Description of the Practice
<b>Leader-Centered Practices</b>	
Organizational Visioning	Establishing an organization's mission and employee understanding and commitment to the mission
Motivational Communication	Conveying a positive image of the organization and employees contributions to the organization
Modeling Desired Behavior	Leads by example where a leader's behavior serves as a model for employees to follow
<b>Shared Responsibility Practices</b>	
Encouraging Input and Feedback	Soliciting employee input and feedback to strengthen employee-organizational engagement
Soliciting Creative Solutions	Seeks new and innovative employee contributions for better ways to do things
Shared Decision-Making	Leader and employees share responsibility for decisions and actions to achieve organizational goals
<b>Capacity-Building Practices</b>	
Relationship-Building Practices	Establishing collaborative relationships with employees based on respect, trust, and mutual contributions
Confidence-Building Practices	Leader provided experiences that strengthen employee beliefs and practices
Coaching Practices	Supervisory guidance and feedback to improve employee performance
<b>Staff Performance Practices</b>	
Performance Expectations	Clearly describes and articulates expected employee behavior and actions
Performance Rewards	Provides positive feedback and other reinforcement for a job well done

### Leader-Centered Practices

The leader-centered practices include behavior leaders use to articulate an organization's vision, the values that underpin the vision, inspire followers to commit to the vision, and what leaders do to model desired behavior. The three checklist indicators, taken together, are what leaders do to inspire employee understanding, buy-in, and commitment to an organization's mission and goals.

### Shared Responsibility Practices

The shared responsibility practices include leader behavior that actively engage employees in actions that contribute to individual and collective decision-making about courses-of-action to achieve organizational goals. The three checklist indicators emphasize how leaders and staff work together in concert to improve individual, collective, and organizational performance.

### Capacity-Building Practices

The capacity-building practices include behavior leaders use to strengthen leader-staff relationships and cooperation, and what leaders do to provide staff confidence-building experiences using coaching, feedback, and other supportive guidance. These leader practices build upon and strengthen employee capacity to make authentic, meaningful contributions to achieving organizational goals.

### Staff Performance Practices

These leader practices include behavior that leadership use to clearly define employee performance expectations and practices and which reward staff for individual and collective accomplishments. Effective staff performance practices include clear communications about how staff performance contribute to individual and collective activity for achieving desired goals.

### Do These Practices Make a Difference?

The study outcomes were organized into seven types of outcome categories: Organizational engagement, team/work group effectiveness, leader trust, employee psychological health, employee self-efficacy belief appraisals, employee

job satisfaction, and employee job performance. The average correlations between each leadership practice and each outcome were used as the measures of the association between the 11 leadership practices and the outcome measures. The results showed that all but one of the 77 leadership practices-outcome measure relationships were significantly related. The leadership measures were, however, differentially related to the study outcomes. The strongest associations were between the leadership practices and trust in leaders, and the weakest relationships were between the leadership practices and follower job performance.

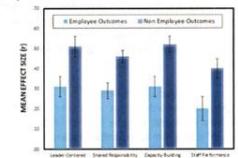

Figure. Relationship between the leadership practices and study outcomes.

Implications for Leadership Development Leadership development emphasizes the use of evidence-based professional development (EBPD) practices to strengthen the capacity of leaders to use evidence-informed roles, behavior, and practices to engage followers in behavior and actions aligned with an organization's mission and goals (Klimoski & Amos, 2012). Because the particular leadership practices used to affect outcomes of interest are likely to be context- and situation specific, the targets of EBPD would differ depending on which leadership practice is best suited for affecting desired change.

# Preservice Brief

- Currently being evaluated

## Research on Pre-Service Personnel Preparation

Early Childhood Personnel Center

At a Glance: Core Pre-Service Practice - Teaching Method Instruction

2019

A meta-synthesis of high impact practices for pre-service professional preparation (Dunst et al, 2019) was conducted to inform teacher education programs and university faculty teaching-related practices. Specific objectives of the study included determining practices associated with university student outcomes and benefits to student learning, and identifying categories of practices associated with optimal outcomes and benefits. A total of 130 studies were included in the meta-analysis, with a combined total of 3 million+ study participants. Findings from this analysis will contribute to the improvement of pre-service teacher education programs in preparing highly qualified educators ready to be able to use practices that improve student learning in the preschool, elementary, middle school and high school levels. The focus of this *At a Glance* is the core pre-service practice of teaching method instruction.

### What is Teaching Method Instruction?

Teaching Method Instruction refers to the instructional techniques and strategies used by IHE faculty in the classroom to improve student outcomes. Seven instructional practices were related to student teaching quality outcomes.

### How Was it Measured?

Eight meta-analyses were examined to identify instructional practices used by faculty to influence students' knowledge and use of teaching practices during preservice coursework. Proxy measures for teaching method instruction, including simulation-based instruction and micro counseling, were included in the study due to a low number of meta syntheses located for pre-service teaching methodology. Instructional practices were measured to identify the relationship between types of teaching method instruction and teaching quality and student outcomes.

### What Did the Research Find?

- All seven practices were related to student teaching quality outcomes.
- The most effective practice for increasing teaching quality was the use of simulation-based instruction with deliberately or intentionally designed opportunities to improve students' clinical practice. Simulation-based instruction, without intentionally designed opportunities, had a smaller positive effect.
- Critical Thinking Instruction and simulation-based instruction had small effect sizes for increasing student knowledge and skill acquisition.
- All seven practices used explicit activities to teach students different types of instructional practices.

### How Pre-Service Preparation Programs Can Use this Information

Pre-Service Preparation Programs can:

- Review coursework to determine if and how intentionally designed simulation-based instruction is used to deliver teaching practices content.
- Review coursework to identify how critical thinking instruction is used to deliver content.
- Provide IHE faculty resources and research to increase their use of different types of teaching methods.

# Definitions

**Standard:** What you must know and be able to do (knowledge and skills)

**Competency:** having the knowledge to demonstrate a skill....a demonstration of knowledge and skills that can be measured

**Indicator:** a rule for the measure of quality; a sign that shows the condition or existence of something

**Practice:** the action of doing

# Goal Setting

*“Can you tell me please which way I ought to go from here?”*

*“That depends a good deal on where you want to get to,” said the Cat.*

*“I don’t much care where,” said Alice.*

*“Then it doesn’t matter which way you walk,” said the Cat.*

Lewis Carroll  
*Alice’s Adventures in Wonderland*

# Strategic Work Plan

Objective 2.					
Objective 3.					

**The world we have created is a product  
of our thinking.**

**It cannot be changed without changing  
our thinking.**

**--Einstein**

# Leadership, Coordination & Sustainability

Structures for ongoing support of all  
personnel development activities

Early Childhood Personnel Center

[www.ecpcta.org](http://www.ecpcta.org)

# Leadership, Coordination, & Sustainability

**Quality Indicator 1:** A cross sector leadership team is in place that can set priorities and make policy, governance, and financial decisions.

**Quality Indicator 2:** There is a written multi-year plan in place to address all sub-components of the CSPD.

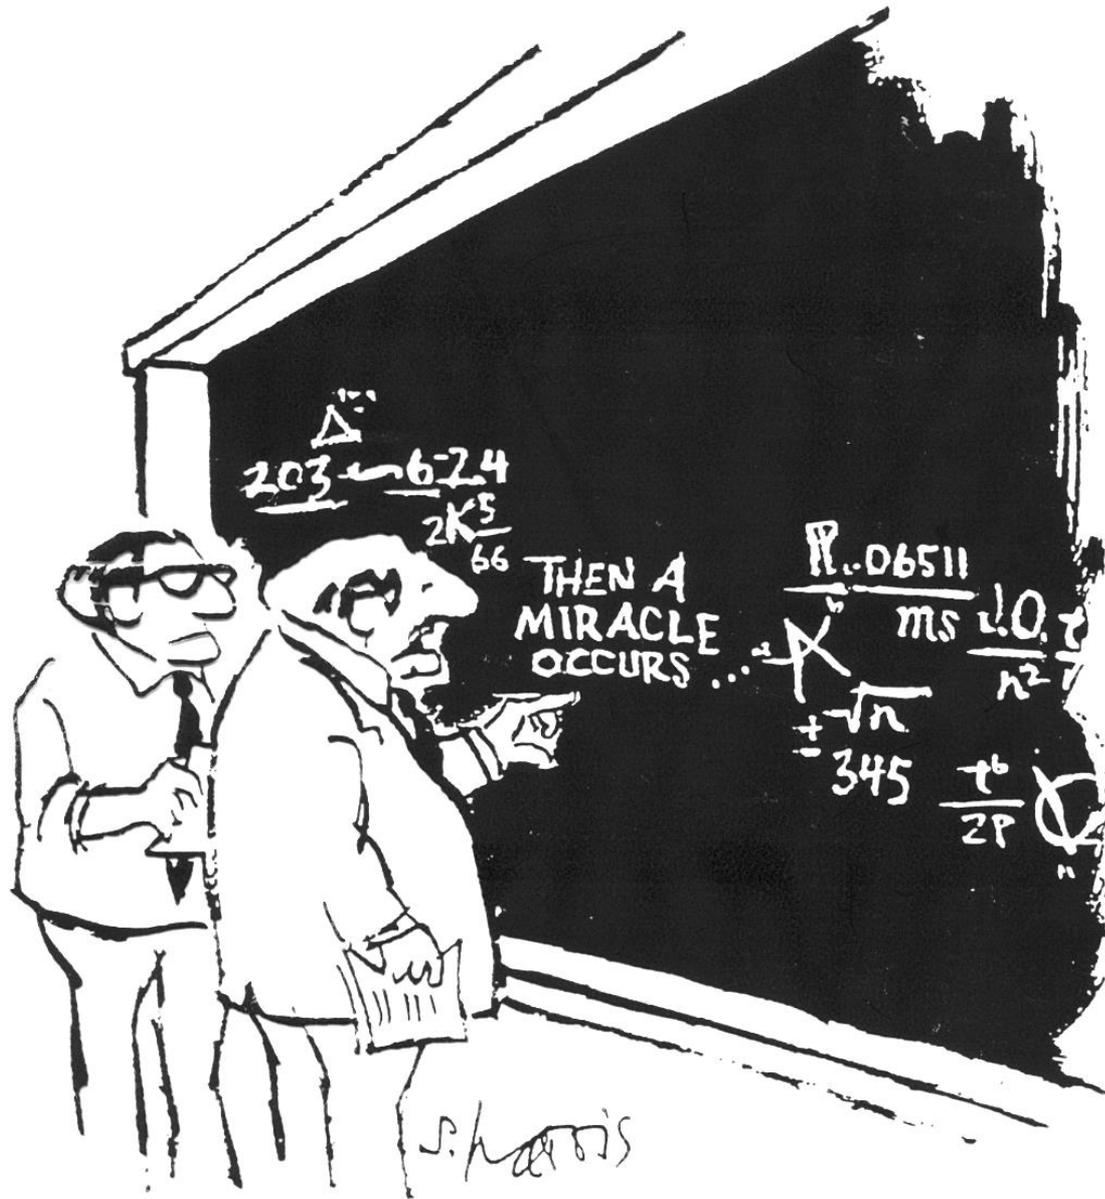

Early Childhood Personnel Center

## Leadership:

- Nature (Characteristic You Were Born With)
- Nurture (Behavior You Can Learn)

*"I think you should be more explicit here in step two."*

Differentiating **between leader development** and **leadership development**. ...

**Leader development** focuses on developing individual knowledge, skills, and abilities (human capital).

**Leadership development** focuses on building networked relationships (social capital) among individuals in an organization.

Early Childhood Personnel Center

# The Top 10 Leadership Competencies, Grouped Into Five Themes

When 195 global leaders were asked to rate 74 qualities, these rose to the top.

# Fundamental Leadership Skills

Ashkenas & Manville, 2018. HBR

- Translate that vision into a clear strategy about what actions to take, and what not to do.
- Recruit, develop, and reward a team of great people to carry out the strategy.
- Focus on measurable results.
- Foster innovation and learning to sustain your team (or organization) and grow new leaders.
- Lead yourself — know yourself, improve yourself, and manage the appropriate balance in your own life.

Early Childhood Personnel Center

[www.ecpcta.org](http://www.ecpcta.org)

# Leaders Must:

establish and maintain principles that become inherent in the organization they are leading:

rationale environments

clear values

openness to change and innovation

maturity

space for people to grow

momentum effectiveness

stewardship

Bloch, 1996; DuPree, 1992

Early Childhood Personnel Center

[www.ecpcta.org](http://www.ecpcta.org)

# Knowledge

- child development,
- evidence-based practices,
- state laws and regulations,
- family-centered approaches,
- federal laws and regulations, and
- group processes.

Bruns et.al, 2017

# Competencies

- professional learning,
- effective relationships,
- shared responsibility,
- data use,
- and effective communication.

Bruns et.al, 2017

# Valued Leadership Competencies

Having a clear purpose

Able to navigating complex systems

Able to develop a shared vision for the service delivery system

Able to build trusting relationships,

Able to take risks,

Able to collaborate

Early Childhood Personnel Center

[www.ecpcta.org](http://www.ecpcta.org)

**Leadership is a process of mutual influence and shared responsibility set in context.**

Early Childhood Personnel Center

[www.ecpcta.org](http://www.ecpcta.org)

# Essential Characteristics of Leadership

- Contextually Bound
- Can Be Learned ( Using learning Theory)
- The Harder the Task, The More Complex the Process of Leadership

## ***Leadership defined:***

the proactive process of influencing others “to act for certain goals that represent the values and motivations—the wants and needs, aspirations and expectations—*of both leaders and followers*” (Burns, 1978, p. 19)

# DEC Leadership Position Paper

- *Leadership capital* is human capacities and organizational cultures that support “active engagement in leadership tasks”
- *Leadership capital* is dynamic and can be shaped, built, or drained and used effectively or ineffectively

Bruder et.al, 2015

Early Childhood Personnel Center

[www.ecpcta.org](http://www.ecpcta.org)

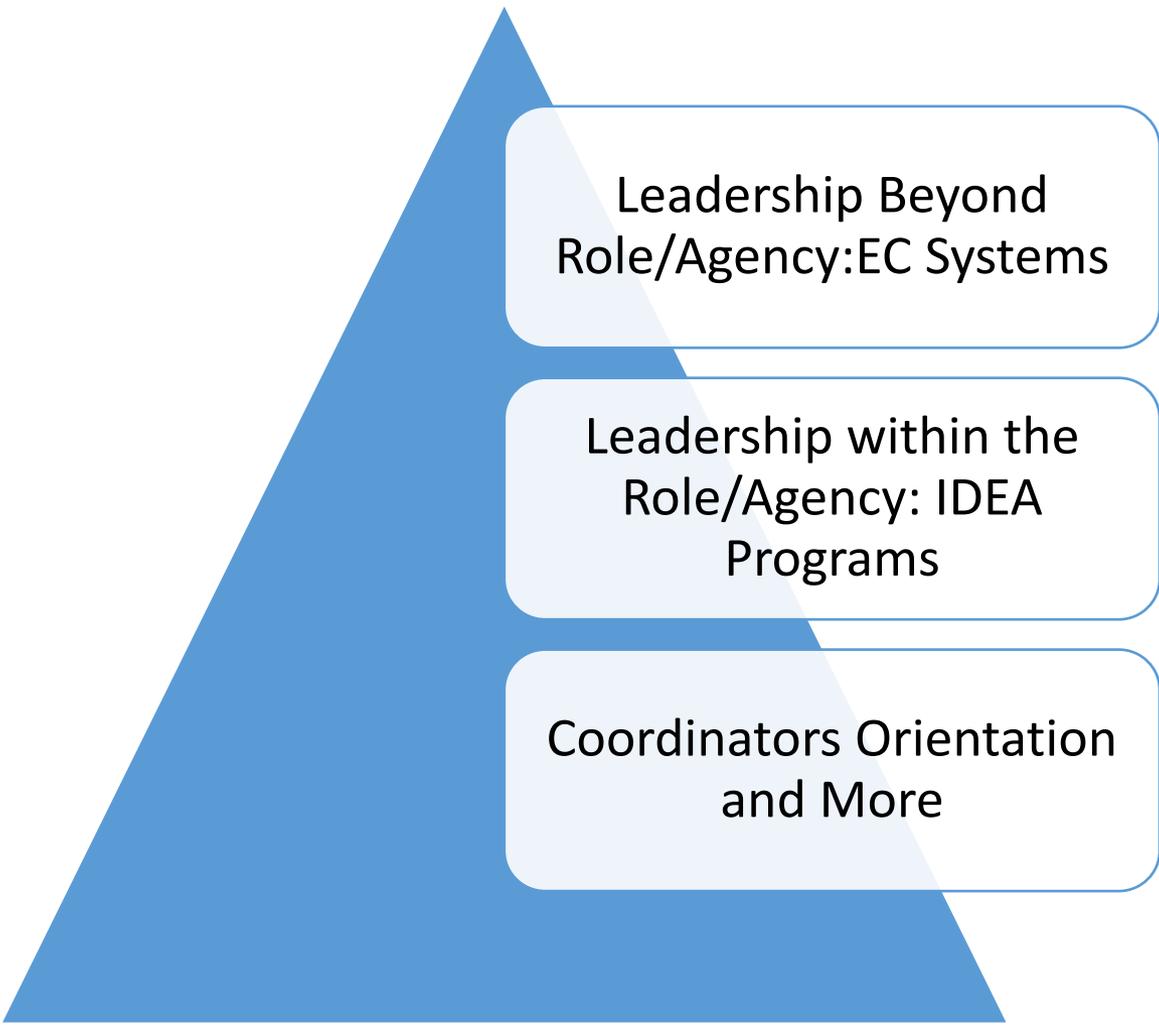

# Leadership Position Statement

- DEC believes the EI/ECSE field should purposefully build and sustain leadership capital across all aspects of practice.
- DEC believes leadership in EI/ECSE is a process that involves mutual influence and shared responsibility
- DEC believes the EI/ECSE field should conduct research to collect evidence about the construct and demonstration of leadership skills across EI/ECSE service systems.

Leadership Beyond  
Role/Agency: EC Systems

Leadership within the  
Role/Agency: IDEA  
Programs

Coordinators Orientation  
and More

# Methodology For Leadership Curriculum

1. Scan the Literature for leadership types
2. Research synthesis as frame
3. Think Tanks Part C/619 (3; N=38 participants)
  - a) Job descriptions/What you do/Need to know
  - b) Refine/reduce into critical knowledge and skills by level
  - c) Theme statements into categories
  - d) Translate into competency statements
4. Survey/Delphi for validation/consensus (N=70)
5. Refined competencies will be sequenced by level
6. Indicators will be developed for each competency
7. Curriculum will be developed with learning activities

# Leadership Practices Constituting the Focus of Investigation

---

## ***Leader-Centered Practices***

***Organizational Visioning***

***Motivational Communication***

Modeling Desired Behavior

***Capacity-Building Practices***

Relationship-Building Practices

***Confidence-Building Practices***

***Coaching Practices***

## ***Shared Responsibility Practices***

Encouraging Employee Input & Feedback

***Soliciting Creative Employee Solutions***

Shared Decision-Making

***Behavioral Practices***

Performance Expectations

Performance Rewards
